To Whom it May Concern,

Re: Directive 2002/95/EC; 2002/96/EC; 2011/65/EU and EU REACH Regulation

Columbus Stainless (Pty) Ltd does not add any lead, mercury, cadmium, PBDE or PBB during the manufacturing process of any of the stainless steel produced. None of the stainless steels produced by Columbus Stainless contain hexavalent chromium in the delivered condition.

All of the stainless steels produced by Columbus Stainless are therefore suitable for recycling.

The levels of radiation detected on the stainless steels produced by Columbus Stainless are equivalent to those corresponding to the natural depth radiation. The normal levels measured on Columbus Stainless material is typically 2.75 nSv/h.

Yours sincerely

NEVILLE FOURIE
TECHNICAL MANAGER
