

## LOCAL CONTENT PRODUCER CONFIRMATION

Columbus Stainless (Pty) Ltd, South African Company Registration number 1999/002477/07, is a producer of stainless steel, carbon and mild steel flat products in South Africa.

Columbus Stainless produces the carbon steel grades, including **but not limited to**, structural steel S355 and pipeline steel X42 and X52; and mild steels like SAE1008.

More than 99% of all raw materials used for the production of these products, are sourced locally in South Africa. Columbus sources sufficient local raw materials to cover the production of its local market products, with the exception of some exotic micro alloying elements, like niobium and titanium; which are not available in South Africa.

These raw materials are melted, rolled and processed at its factory in Middelburg, Mpumalanga, to a variety of carbon and mild steel flat products.
