

ENVIRONMENTAL POLICY

In our daily business of producing steel, we take practical care of our environment and measures to prevent possible adverse effects by our processes and products.

The Company commits to:

- Raise the level of awareness within the organisation for the need to conserve and protect the environment, and to promote individual responsibility for conservation.
- Render the site acceptable in terms of the applicable environmental legislation, regulations, by-laws and other requirements.
- Strive towards appropriate international standards for pollution prevention.
- Continuously monitor performance against these standards.
- Ensure optimal utilisation of raw materials and energy sources.
- Ensure commitment to continual improvement.
- Enforce such measures as may be necessary to conserve and protect the environment.

All our goals and objectives are aligned with this policy.
